(An ISO 9001 certified company)

## About Us

Established in 1994, Adroit Power Systems began as a manufacturer of LT transformers and has evolved into a leading provider of comprehensive power conditioning solutions. For three decades, we have been the trusted partner for industries across India, the Middle East, and Africa, ensuring businesses never experience downtime due to power instability.

Our journey as an OEM reflects continuous innovation and unwavering commitment to quality and strong customer relationship. From our initial focus on transformers for the stabilizer and UPS industry, we have expanded to offer cutting-edge servo stabilizers, static stabilizers, and complete power management systems up to 2000 kVA capacity. Additionally, the company prides itself on strong customer relationships, maintaining high-quality standards across its product range.

## Power Solutions Provider

From Voltage Stabilization to renewable energy integration, Adroit offers **end-to-end power conditioning solutions** tailored to your Industry's unique challenges. Our expertise spans seven specialized solution categories

1

### Energy Efficiency & Power Audit

Optimizing consumption through load analysis, system diagnostics, power factor improvement, and ROI-focused retrofits with detailed before-after reporting.

2

### Smart Voltage Management

Servo stabilizers, static stabilizers, OVCD, CVCF, CVT, and autophase selectors—intelligent protection for every electrical system.

3

### Power Quality & Harmonic Correction

Active harmonic filters, SVG, APFC, isolation transformers—ensuring stable voltage and uninterrupted operations.

4

### Power Backup & Continuity

Residential and industrial UPS, modular systems, sodium all-in-one UPS, LFP backup, and solar hybrid integration.

5

### Renewable Energy & Storage

Solar on-grid, off-grid, hybrid systems, ESS with lithium and sodium batteries, solar UPS conversion, and battery monitoring.

6

### Industry-Specific Solutions

Customized power quality solutions for textiles, healthcare, IT data centers, FMCG, food processing, and educational institutions.

7

### Smart Power Management & R&D

Joint product development, pre-export testing, system design, vendor coordination, and prototyping for specialized applications.
